CITY COUNCIL

The majority of the ambulance service providers who testified before the Ambulance Advisory Committee specifically requested a sole provider system for both emergency and non-emergency ambulance transport, due to financial and logistic considerations. The Ambulance Advisory Committee after careful consideration and input from citizens, healthcare officials, and the ambulance providers attending the committee meetings, has voted unanimously to recommend continuing with a sole provider for emergency and non-emergency ambulance transport in Rapides Parish. Upon the recommendation of the Ambulance Advisory Committee, the Rapides Parish Police Jury is considering adoption of a new set of parish ordinances providing for a sole provider for emergency and non-emergency ambulance transport within the Parish of Rapides, as well as a zone map for response times within the parish and penalty and contract termination provisions. The proposed parish ordinance will provide for the creation of the Ambulance Service Advisory Board made up of representatives of stakeholders, including a city appointment (Fire Chief) to monitor contract compliance, response times and consider public complaints.

Additional Information Attached

The Central Louisiana Regional Port has offered to purchase a 8.231 acre tract of land adjacent to Industrial Port Road. Notice procedures and delays for publication are set out as requirements in R.S. 33: 4712. This tract is no longer needed by the city and will benefit the Port by allowing development of property for industrial purposes. The property has a current appraised value of \$20,776 an acre. The property is adjacent to the city railroad spur and the Levee and additional city properties. A servitude agreement will be considered to allow the Port access to Port property and the tract to be sold. An agreement with the rail spur lessee Martin Marietta is necessary and consistent with the proposed sale to the Port. Various existing servitudes will be retained and all is consistent with a public purpose and economic development.

The building was converted to its present use many years ago and has a large open area work space and some partitioned offices, etc.

The overall condition is average to good but does have some deferred maintenance. The open floor plan isn't considered truly functional but could possibly be divided into smaller units because of the design and the long front wall. It is under one utility metering system.

There is evidence of a small roof leak. According to the owner the roof is 12 years +/- old and is maintained.
